

Science Workshop Agenda
September 25 and 26, 2008
Coral Springs Florida

Thursday, September 25, 2008

1PM – 1:15PM	Group Introductions
1:15PM – 1:45PM	Meeting purpose
1:45PM – 2:15PM	Overview of Guidelines and Science Information Resources
2:15PM – 4:15PM	Identify Attributes of Areas of Critical Ecological Concern and Develop Description of These Areas
4:15PM – 5PM	Establish Criteria and Methods for Identifying Areas Meeting the Attributes
5:30	No Host Social

Friday, September 26, 2008

8:30AM – 9AM	Recap of Previous Days Products/Accomplishments
9AM – 12PM	Develop Completed List with Supporting Information for Each Area Deemed of Critical Ecological Concern

Public comments will be accepted throughout the workshop.

Guiding Questions?

1. What are some of the things that we are on the verge of losing now?
2. What areas are changing irreversibly?
3. What are the things in these areas that need to be restored in order to prevent further degradation?
4. Will some of these things or areas be lost irrespective of restoration?
5. Will some of these things or areas continue to change and perhaps be lost even with, or as a result of restoration, but could they be restored in other ways?
